# Safety & Health Considerations

COVID-19 is a new disease, and we are still learning about how it spreads. Here's what we know now:

- It mainly spreads from person-to-person.
- Between people who are in close contact with one another (within about 6 feet);
- Through respiratory droplets produced when a person who has COVID-19 coughs, sneezes, or talks.
- You can get the virus from people who don't seem sick or don't show symptoms.
- You might be able to get COVID-19 by touching a surface or object that has the virus on it, and then touching your mouth, nose, or your eyes.

Stay home if you are having symptoms of COVID-19.

Symptoms may include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea
- This may not be all of the symptoms if you are sick.
